

'Wondering - Questioning - Exploring - Investigating'

At Garton on the Wolds Primary School:

- We think about what we already know and what we would like to know.
- We ask open-ended questions.
- We discuss and share our ideas and work together.
- We plan and carry out different types of enquiries to try and answer our questions.
- We use a range of equipment and resources.
- We enjoy exploring our environment - indoor and outdoor.
- We use scientific vocabulary.
- We learn about scientists and how science has shaped our world.
- We understand why science is relevant to us and our lives.
